I have a Trane XE 70 furnace with AC. The blower motor went out so I bought generic motor. I installed it already. I think I need to increase the speed as in the air flow at resisters is low. Can someone help me figure this out? Do I run this in Med.-Hi? or low Med.? First picture is coming from the new motor. I splice the old connector on. Second picture is to the furnace Third picture is old ...

Each model of the XE 70 furnace may take a different size of air filter. Where does your filter go in your furnace Top, Bottom, on the side where? does it go in the furnace or the ductwork? Can you post a picture of where it goes? This being said you should really think about updating your furnace as your furnace is very old and possibly unsafe. That model of Trane was not built by Trane and ...

The Trane XE90 is a high-efficiency furnace that reduces fuel waste by using up to 90 percent of stored fuel, and may require a thermostat restart to fix heating issues that occur while in use. A restart is the first step in attempting to resolve common furnace issues, and can fix minor problems that prevent the furnace from operating normally. Persistent problems with the Trane XE90 require ...

*FURNACE - TRANE XE 70 - appliances - by owner - sale*

Trane 95 and 90 gas furnaces deliver at least 90% efficiency, far exceeding the government minimum standard of 80 AFUE for new furnaces. If you have a furnace that is at least 10 years old, it probably has an AFUE somewhere between 60 and 70 – meaning up to 40 cents of every dollar you pay for fuel is wasted.
