1.8T ENGINE TORQUE SPECS / SETTINGS

While the original VW specifications indicate that the studs for the crankcase halves require 25 foot-lbs. of torque, most engine rebuilders use 30 foot-lbs. of torque for the 10mm studs and 18 foot-lbs. of torque for the 8mm studs. The four small nuts for the crankcase halves require 14 foot-lbs. of torque. The cylinder head nuts receive 23 foot-lbs. of torque, and the engine mounting bolts require 22 foot-lbs. of torque.

Can anyone give me torque settings for VW Passat B6 front suspension? I'm replacing a ball joint and lower control arm and had to take some other bits apart to get at them as they'd fused together. Here's what I've pieced together from googling:

Can anyone give me torque settings for VW Passat B6 front

The head torque settings for a VW Polo 1.6 cylinder head are 40 newton meters with 2- 90 degree turns. Bolts should always be replaced. It is not recommended to reuse the bolts. 0

Vw polo 1.6 cylinder head torque settings? - Answers

There is no VW supplied torque settings for the oil pickup pipe, so if you are rebuilding your engine from fresh or even have the sump off, we STRONGLY recommend replacing the oil pickup and rubber o-ring whilst everything is off. The parts are only £10-15 so well worthwhile.

Engine Tightening Torques - 1.8T Tuning

simultaneous at factory . vw vindis did say to me the vw 1.6 and above engines are better , I had to laugh . grabbed this one for mrs to learn to drive group 2 etc. Imagine if vw had said oh the old beetle engine cannot be taken apart
