The reason I asked is I once pulled a cowl off my OX66 225 to check things out and when I put it back on it disconnected a green wire at the rear of the motor. Motor started up just fine but would not idle down. After looking for the problem and re-connecting the wire (plug connection) everything returned to normal. Lesson learned for me.

During the last several months we had the opportunity to sea trial four boats with Yamaha outboard motors in the 200 to 250 hp range. Two sets of these were on Grady-White 272 Sailfish, and another on a Pursuit 2855. This makes for a total of eight engines ranging in years from 1995 to 1999, which gave us a pretty good look at how these engines are performing over time.
